Introduction

GPS-102 is a GPS receiver module with integrated dead reckoning. The GPS-102 includes dead reckoning sensors to track its course even when the GPS signal is blocked, for example in urban areas or tunnels. If GPS coverage is lost, the GPS-102 keeps on navigating.

Introduction

GPS-106 is designed by u-blox, and sets a new standard for GPS and GALILEO receiver modules. Featuring the high performance 50-channel u-blox 5 technology, these modules provide excellent performance and flexibility at an economical price.
