

HLP-2603 Hybrid Log Periodic Antenna

Product Overview

Ultra Wide Range The TDK RF Solutions HLP-2603 Hybrid Log Periodic antenna offers unequalled performance over the ultra wide frequency range of 26 MHz to 3 GHz for EMC immunity and emissions measurements. Significant time savings can be realized while testing to the various European, North American, and Asian standards because you are able to test continuously across the frequency range of interest. The HLP-2603 is designed for testing at 10 V/m with 80% AM modulation with minimum amplifier requirements.

Dual Mode Use Inherent in the design of the HLP-2603 is its dual-mode use: radiated emissions and radiated immunity testing. With its ultra wide range, the HLP-2603 is an ideal replacement for at least two (possibly three) antennas.

The TDK RF Solutions HLP-2603 Hybrid LPD antenna offers unequalled performance over the ultra wide frequency range of 26 MHz to 3 GHz, dual-mode capabilities, and an efficient design.
