

# Programmable Attenuators

## P-AT Series

### ■ Features

- 1. Used for frequencies from DC to 26.5GHz (max.)**  
Input/output couplings utilizes Hirose's HE\* connector, which is combination of the internal attenuation elements, provides the required attenuation characteristic.
- 2. Self-disconnecting**  
The drive current will automatically switch off after setting the attenuation.
- 3. Automatic return**  
In the event of sudden shock the attenuation will quickly return to the pre-set level.

### ■ Applications

Wide variety of measuring instruments and other devices requiring control of high frequency transmission lines.

- \* HE connector will mate with K type connectors
- \* K connector is a trademark of Anritsu Co.

### ■ Product Specifications

Ratings	Frequency range	DC~8GHz(P-AT-6,AP-AT-7) DC~26.5GHz(P-AT-8)	Operating temperate range	-10°C to +75°C(No freezing)
			Operating relative humidity	95% Max.

Characteristic	Requirements	Conditions
1.Vibration	No electrical discontinuity of 1 μs or more	Frequency of 10 to 55 Hz, overall amplitude of 1.5 mm for 2 hours in each of 3 directions Acceleration of 98 m/s <sup>2</sup> , sine half-wave waveform, 3 cycles in each of the 3 axis
2.Shock	No damage, cracks, or parts dislocation	
3.Temperature cycle	No damage, cracks, or parts dislocation	

●The test method conforms to MIL-STD-202.

### ■ Materials and Finishes

Component	Material	Finish
Body	Aluminum	Conductive alumite
Coupling connector body	Stainless steel	Passivated
Female contact	Beryllium Copper	Gold plating

### ■ Ordering Information

**P-AT - 6 ( 8 - 70 ) A**
