

Power Chokes – Vertical Mount

The Coilcraft PCV power chokes are low cost power inductors whose simple design provides rugged reliability and performance. They feature 130°C class insulation and are available in a wide range of standard values.

The open core construction provides the highest saturation current available in a low cost power choke. The PCV-1 Series incorporates a plastic mounting header for maximum lead protection and consistency. The PCV-2 Series uses a ferrite bobbin core to provide the highest possible inductance at the lowest cost.

Coilcraft **Designer's Kit P405** contains samples of the part numbers shown in bold from the PCV-0 and PCV-2 Series. Contact Coilcraft or visit <http://order.coilcraft.com> to purchase on-line.

PCV-0 Series

PCV-1 Series

PCV-2 Series

Dimensions are in $\frac{\text{inches}}{\text{mm}}$

Terminations: Tin-silver over copper

1. Tested at 15.75 kHz, 0.1 V_{rms}, with DC bias applied up to the I_{rms} current.
2. Current that causes a 40°C temperature rise from 25°C ambient.
3. **Ambient temperature range:** -40°C to +85°C with I_{rms} current
4. **Storage temperature range:** Component: -40°C to +125°C
Packaging: -40°C to +80°C
5. Electrical specifications at 25°C.
6. Parts in bold type are included in Coilcraft Designer's Kit P405.
Refer to Doc 362 "Soldering Surface Mount Components" before soldering.
