Order Number 213069-0600

#### **FEATURES**

- Applicator designed to industry-standard mounting and 135.80mm (5.346") shut height
- Quick setup time; plus, the crimp height, track and feed adjustments can be set without removing the applicator from the press
- Fine adjustment allows users to achieve target with little effort by adjusting in increments of .015mm (.0006") for conductor crimp height and .025mm (.001") for insulation height
- Independent adjustment rings allow users to quickly adjust the conductor or insulation crimp height without affecting each other
- Directly adapts to most automatic wire processing machines

### **SCOPE**

**Products:** Squba 3.6 Large Receptacle, 16 AWG wire.

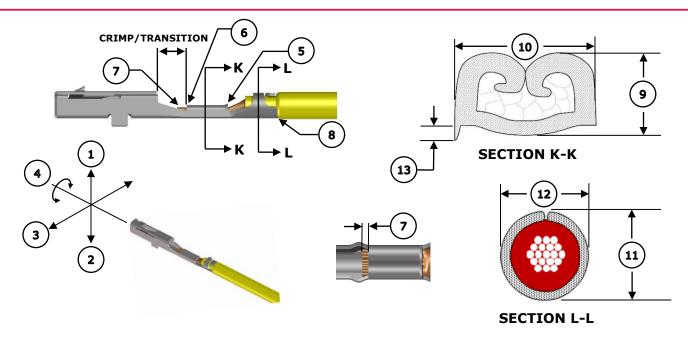

| Terminal Series | Terminal Order<br>No. | Wire      |        | Insulation Diameter |          | Strip Length |         |
|-----------------|-----------------------|-----------|--------|---------------------|----------|--------------|---------|
| No.             |                       | Wire Type | Size   | mm                  | In.      | mm           | In.     |
| 207777          | 207777-0001           | UL1007    | 16 AWG | 2.40 max            | .094 max | 4.00-4.50    | .157177 |
|                 |                       | UL1061    | 16 AWG | 1.90 min            | .075 min | 4.00-4.50    | .157177 |

**CAUTION:** Lubrication must be used to prevent terminals from sticking in the conductor punch. Use 63801-7240 oiler or equivalent.

#### **NOTES**

#### **Applicator Notes**

- This applicator is for automatic wire processor use only.
- This applicator does not include a cutting insert.
- Installing a cutting insert will cause jamming in this applicator.
- Lubrication must be used to prevent terminals from sticking in the conductor punch. Use 63801-7240 oiler or equivalent.

**CUTTING INSERT** 

# **Specification Notes**

- It is very important that the brush length is consistently within specification for this sealed connector system to work properly.
- This applicator should only be run in a properly set up wire processor to consistently achieve the brush length.

#### **General Notes**

- 1. Molex recommends that an extra perishable tooling kit be maintained at your facility.
- 2. Verify tooling alignment by hand cycling the press and applicator before crimping under power. Check that all screws are tight.
- 3. Slugs, terminals, dirt and oil should be kept clear of the work area.
- 4. Wear safety glasses at all times.
- 5. For recommended maintenance, refer to the FA2 manual (TM-638080200).
- 6. Molex recommends crimping standard copper wire only.

# **WARNINGS**

**CAUTION:** This applicator must be installed in a press with a standard shut height of 135.80mm (5.346"). Tooling damage could result at a lower setting.

**CAUTION:** To prevent injury, never operate this applicator without the guards supplied with the press or wire-processing machine in place. Reference the press or wire processing manufacturer's instruction manual.

**CAUTION:** Molex tooling crimp specifications are valid only when used with Molex terminals and tooling manufactured by Molex and sold by Molex or authorized distributors ("Molex Tooling"). When using tooling other than Molex Tooling with Molex-specific connector systems listed in our ATS documents, the Molex Tooling qualification does not apply, and the responsibility for full qualification of the connector system is that of the customer. Molex accepts no liability for connector performance or tooling support where tooling other than Molex Tooling is used or where Molex Tooling is modified.

### **FACTORY SETTINGS**

#### **Feed Pawl Assembly**

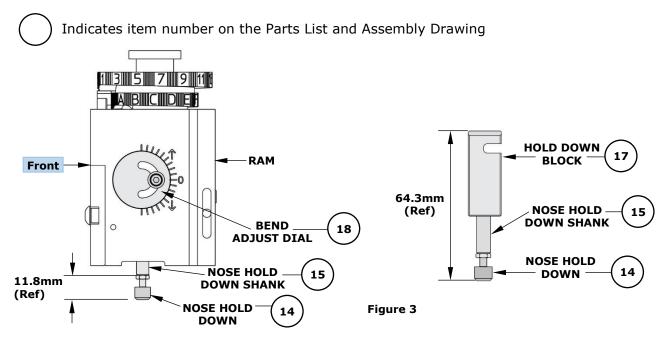

The FA2 applicator number 213069-0600 ships with the following factory settings. See Figure 2:

- The feed pawl shaft and M3 screw that holds the feed pawl spring are in position 2.
- The pin is in position C.

**Note:** Each applicator is configured and tested by Molex prior to shipping, and the above settings were used to produce the included sample crimps.

## Third Dial/Ram Assembly

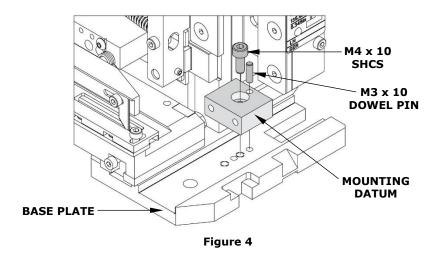

**Note:** The above dimensions were measured during setup and are included as a reference only. Additional adjustments may be required before crimping for production.

Doc. No: 2130690600 Release Date: 06-24-19 **UNCONTROLLED COPY** Page 6 of 7

Revision: A2 Revision Date: 11-04-19

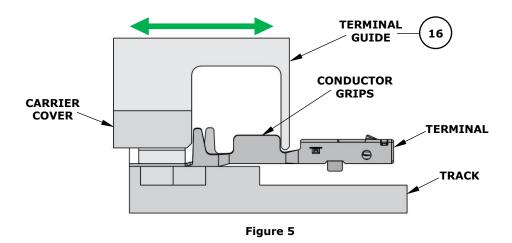

# **Mounting Datum Location**

This applicator was assembled and tested by Molex with the mounting datum in the location shown in Figure 4. Do not remove the mounting datum.

#### **Terminal Guide Position**

The terminal guide on this applicator should be positioned so that it is in front of the terminal conductor grips, as shown in Figure 5.
