- USB-C device that supports USB DisplayPort Alternate Mode
- VGA-enabled monitor

Package Includes

- U444-016-V USB 3.1 Gen 1 to VGA DisplayPort Alternate Mode Adapter Cable (M/M), 16 ft.

Description

The U444-016-V USB 3.1 Gen 1 to VGA DisplayPort Alternate Mode Adapter Cable supports USB DisplayPort Alternate Mode for displaying video on a VGA monitor, television or projector via your computer, tablet, laptop or smartphone's USB-C™ port. It's an ideal tool for multitasking, viewing large spreadsheets, editing documents, giving presentations at trade shows and conferences, or playing games and watching movies on large screens.

You can extend video from your primary display to another, duplicate the same video on both displays, or change the second display to your primary display. No drivers or external power supply is needed. Connect the U444-016-V's USB-C male plug to the USB-C port on your smartphone, tablet, Ultrabook or computer. Then, connect the adapter's VGA HD15 male plug to the VGA port on your display.

The U444-016-V supports high-definition (HD) video resolutions up to 1920 x 1200 (@ 60 Hz), including 1080p. It also supports data transfer rates up to 5 Gbps and 36-bit Deep Color (12 bits per channel). Compatible with USB-C devices that support USB DisplayPort Alternate Mode.

Features

Easy to Add a Display

- Supports USB DisplayPort Alternate Mode for transmitting video to a VGA display via your computer, tablet, laptop or smartphone's USB-C port
- Extend video to a second monitor, duplicate the same video on both monitors, or make the second monitor your primary display
