

V-I Chip™ PRM™ Regulator and VTM™ Current Multiplier

- Sine Amplitude Converter (VTM)
 - ZVS buck-boost regulator (PRM)
 - Regulation 0.2% (Remote Sense)
 - Small footprint: 1.1 in² or 0.55 in²
- High efficiency up to 97%
 - Low profile 0.265"
 - Power Density > 1000 W/in³

Product Description

The PRM is a very efficient non-isolated regulator capable of both boosting and bucking a wide range input voltage and provides a regulated, adjustable output voltage or “Factorized Bus”. PRMs can be used stand-alone as non-isolated voltage regulators or combined with VTMs for a complete isolated, DC-DC solution with higher efficiency and power density. The VTM provides point-of-load, fixed ratio voltage transformation with extremely fast transient response and isolation to 2,250 Vdc.

PRM Model Number*	Input Voltage		Output Voltage Range (V)	Output Power Max. (W)	Output Current Max. (A)	Temp. Grade	Package
	Nom. (V)	Range (V)
