

MINI 980/1550nm WDM/ISOLATOR HYBRID

Mini WDIH59 Series

Product Description

Oplink's WDIH is a combination of a 980/1550(1585)nm filter and a C-band 1550nm (or L-band 1585nm) polarization insensitive optical isolator. The Mini WDIH is a low cost model with excellent performance including low insertion loss, high isolation, high return loss, and low polarization dependent loss (PDL). This product offers integrated solutions to EDFA applications by combining more functions into a very compact package. The product package dimension is about 3.0×30mm.

Oplink can provide customized designs to meet specialized feature applications. Also, Oplink offers modular assemblies that integrate other components to form a full function module or subsystem.
