DERATING CURVE

RCD's Series SF resistors feature an all-welded "Kelvin" 4-terminal design in a surface mount package, reducing the effects of lead resistance. High-temperature case provides excellent environmental protection. Series SF utilizes the same technology as our popular Series LVF leaded resistors with over 30 years of proven experience.

RCD Type	Wattage @ 25°C	Max. Current	Resistance Range
SF1	1W	10A	.001 to 4K
SFG2	2W - 3W*	15A	.001 to 5K

* SFG2 capable of 3W dissipation with consideration of pcb layout and pad geometry
