## Cautions

1. In case of loosening, please use washer when install the relay with M5 screw, and the torque within 3N·m to 4N·m. The push and pull force for terminals is 49N for load terminals and 49N for coil terminals. The torque beyond the range may cause damage.

2. Please do not adhere foreign materials like oil on the terminals and please use the wire with cross section area 20mm<sup>2</sup> min, otherwise the terminal parts may have abnormal heating.

3. Cautions of Relay installation:

### Unrecommended method

The hole of mounting panel at customer-side is too large.

### Recommended method

The hole in mounting panel at customer-side is M5

When use M5 screw, the thickness and strength of the washer needs to be guaranteed or it may deform and burst the cover.
