

FEATURES

- ◆ 2:1 Wide input voltage range
- ◆ Operating temperature: -40°C ~ +85 °C
- ◆ 1500VDC isolation
- ◆ No heatsink required
- ◆ Internal SMD construction
- ◆ MTBF>1,000,000 hours
- ◆ Short circuit protection(automatic recovery)
- ◆ Industry standard pinout
- ◆ RoHS Compliance

MODEL SELECTION

WRB^① 24^② 12^③ Y^④ MT^⑤ -3W^⑥

- ① Product Series
- ② Input Voltage
- ③ Output Voltage
- ④ Wide (2:1) Input Range
- ⑤ Mini package style
- ⑥ Rated Power

APPLICATIONS

The WRA_YMT-3W&WRB_YMT-3W series are specially designed for applications where a wide range input voltage power supplies are isolated from the input power supply in a distributed power supply system on a circuit board.

These products apply to:

- 1) Where the voltage of the input power supply is wide range(voltage range $\leq 2:1$);
- 2) Where isolation is necessary between input and output (isolation voltage ≤ 1500 VDC);
- 3) Where the regulation of the output voltage and the output ripple noise are demanded.

APPLICATION NOTE

Requirement on output load

In order to ensure the product operate efficiently and reliably, in addition to a max load (namely full load), a minimum load is specified for this kind of DC/DC converter. Make sure the specified range of input voltage is not exceeded, the minimum output load no less than 10% load. If the actual load is less than the specified minimum load, the output ripple may increase sharply while its efficiency and reliability will reduce greatly. If the actual output power is very small, please add an appropriate resistor as extra loading, or contact our company for other lower output power products.

Recommended Circuit

All the WRA_YMT-3W & WRB_YMT-3W series have been tested according to the following recommended testing circuit before leaving factory. This series should be tested under load (See Figure 1).

If you want to further decrease the input/output ripple, you can increase capacitance properly or choose capacitors with low ESR. However, the capacitance of the output filter capacitor must be proper. If the capacitance is too big, a startup problem might arise. For every channel of output, provided the safe and reliable operation is ensured, the greatest capacitance of its filter capacitor sees (Table 1).

General: Cin: 5V&12V 100μF
24V&48V 10μF~47μF
Cout: 10μF/100mA

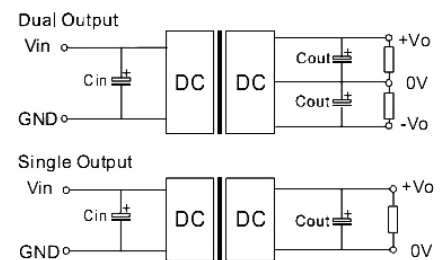

Input Current

When it is used in unregulated power supply, be sure that the fluctuating range of the power supply and the rippled voltage do not exceed the module standard. Input current of power supply should afford the flash startup current of this kind of DC/DC module (Figure 2).

General: $I_p \leq 1.6 * I_{in-max}(V_{in}=5V)$
 $I_p \leq 1.4 * I_{in-max}(V_{in}=12V/24V/48V)$

No parallel connection or plug and play

Note:

1. The load shouldn't be less than 10%, otherwise ripple will increase dramatically.
2. Operation under 10% load will not damage the converter; However, they may not meet all specification listed.
3. Capacitor MAX load tested at input voltage range and full load.
4. All specifications measured at Ta=25°C, humidity<75%, nominal input voltage and rated output load unless otherwise specified.
5. Only typical models listed, other models may be different, please contact our technical person for more details.
6. In this datasheet, all the test methods of indications are based on corporate standards.

RoHS COMPLIANT INFORMATION

This series is compatible with RoHS soldering systems with a peak wave solder temperature of 300°C for 10 seconds. The pin termination finish on the SIP package type is Tin Plate, Hot Dipped over Matte Tin with Nickel Preplate. The DIP types are Matte Tin over Nickel Preplate. Both types in this series are backward compatible with Sn/Pb soldering systems.

REACH COMPLIANT INFORMATION

This series has proven that this product does not contain harmful chemicals, it also has harmful chemical substances through the registration, inspection and approval.
