

# SN75175

## Quad EIA-485 Line Receiver

The Motorola SN75175 is a monolithic quad differential line receiver with three-state outputs. It is designed specifically to meet the requirements of EIA-485, EIA-422A/23A Standards and CCITT recommendations.

The device is optimized for balanced multipoint bus transmission at rates up to 10 megabits per second. It also features high input impedance, input hysteresis for increased noise immunity, and input sensitivity of  $\pm 200$  mV over a common mode input voltage range of  $-12$  V to  $12$  V. The SN75175 is designed for optimum performance when used with the SN75172 or SN75174 quad differential line drivers.

- Meets EIA Standards EIA-422A and EIA-423A, EIA-485
- Meets CCITT Recommendations V.10, V.11, X.26, and X.27
- Designed for Multipoint Transmission on Long Bus Lines in Noisy Environments
- 3-State Outputs
- Common-Mode Input Voltage Range . . .  $-12$  V to  $12$  V
- Input Sensitivity . . .  $\pm 200$  mV
- Input Hysteresis . . .  $50$  mV Typ
- High Input Impedance . . . 1 EIA-485 Unit Load
- Operates from Single  $5.0$  V Supply
- Lower Power Requirements
- Plug-In Replacement for MC3486

This device contains 174 active transistors.

### MAXIMUM RATINGS

| Rating                            | Symbol    | Value           | Unit               |
|-----------------------------------|-----------|-----------------|--------------------|
| Power Supply Voltage              | $V_{CC}$  | 7.0             | Vdc                |
| Input Common Mode Voltage         | $V_{ICM}$ | $\pm 25$        | Vdc                |
| Input Differential Voltage        | $V_{ID}$  | $\pm 25$        | Vdc                |
| Three-State Control Input Voltage | $V_I$     | 7.0             | Vdc                |
| Output Sink Current               | $I_O$     | 50              | mA                 |
| Storage Temperature               | $T_{stg}$ | $-65$ to $+150$ | $^{\circ}\text{C}$ |
| Operating Junction Temperature    | $T_J$     | $+150$          | $^{\circ}\text{C}$ |

**NOTE:** ESD data available upon request.

### RECOMMENDED OPERATING CONDITIONS

| Rating                           | Symbol    | Value          | Unit               |
|----------------------------------|-----------|----------------|--------------------|
| Power Supply Voltage             | $V_{CC}$  | 4.75 to 5.25   | Vdc                |
| Operating Ambient Temperature    | $T_A$     | 0 to $+70$     | $^{\circ}\text{C}$ |
| Input Common Mode Voltage Range  | $V_{ICM}$ | $-12$ to $+12$ | Vdc                |
| Input Differential Voltage Range | $V_{IDR}$ | $-12$ to $+12$ | Vdc                |

| Power Supply Current ( $V_{IL} = 0\text{ V}$ ) (All Inputs Grounded)                                                                                                                                                                                                                         | $I_{CC}$                         | –             | –           | 70               | mA            |

**NOTES:** 1. All currents into device pins are shown as positive, out of device pins are negative. All voltages referenced to ground unless otherwise noted.  
2. Differential input threshold voltage and guaranteed output levels are done simultaneously for worst case.  
3. Refer to EIA–485 for exact conditions. Input balance and guaranteed output levels are done simultaneously for worst case.  
4. Input resistance should be derived from input line current specifications and is shown for reference only. See EIA–485 and input line current specifications for more specific input resistance information.  
5. Only one output at a time should be shorted.

Motorola reserves the right to make changes without further notice to any products herein. Motorola makes no warranty, representation or guarantee regarding the suitability of its products for any particular purpose, nor does Motorola assume any liability arising out of the application or use of any product or circuit, and specifically disclaims any and all liability, including without limitation consequential or incidental damages. "Typical" parameters which may be provided in Motorola data sheets and/or specifications can and do vary in different applications and actual performance may vary over time. All operating parameters, including "Typicals" must be validated for each customer application by customer's technical experts. Motorola does not convey any license under its patent rights nor the rights of others. Motorola products are not designed, intended, or authorized for use as components in systems intended for surgical implant into the body, or other applications intended to support or sustain life, or for any other application in which the failure of the Motorola product could create a situation where personal injury or death may occur. Should Buyer purchase or use Motorola products for any such unintended or unauthorized application, Buyer shall indemnify and hold Motorola and its officers, employees, subsidiaries, affiliates, and distributors harmless against all claims, costs, damages, and expenses, and reasonable attorney fees arising out of, directly or indirectly, any claim of personal injury or death associated with such unintended or unauthorized use, even if such claim alleges that Motorola was negligent regarding the design or manufacture of the part. Motorola and  are registered trademarks of Motorola, Inc. Motorola, Inc. is an Equal Opportunity/Affirmative Action Employer.
