Description

The MAAM26100-P1 is a GaAs MMIC two stage high efficiency power amplifier in a lead-free high performance bolt down ceramic package. MAAM26100-P1 is a fully monolithic design which eliminates the need for external circuitry in 50-ohm systems.

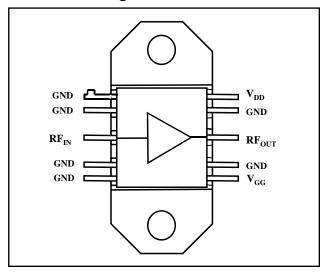

The MAAM26100-P1 is ideally suited for driver amplifiers and transmitter outputs in UMTS applications, test equipment, electronic warfare jammers, missile subsystems and phased array radars.

The MAAM26100-P1 is fabricated using a mature 0.5-micron gate length GaAs process. The process features full passivation for increased performance reliability.

Functional Schematic 3,4

- Nominal bias is obtained by first connecting -5 volts to pin 6 (VGG), followed by connecting +8 volts to pin 10 (VDD). Note
- 4. RF ground and thermal interface is the flange (case bottom). Adequate heat sinking is required.

Electrical Specifications: $T_A = 25$ °C, $V_{DD} = +8$ V, $V_{GG} = -5$ V
