ZAC622-100WSX +

ZACS622-100WS+

## Product Overview

Mini-Circuits' ZACS622-100W+ is a 2-way $0^{\circ}$ splitter/combiner providing very high power handling and low insertion loss across 650 to 6200 MHz , covering the primary wireless communications bands as well as UHF, SatCom, and more. Its outstanding combination of high power and low loss minimize power dissipation due to intrinsic losses and provide excellent signal fidelity from input to output. This model also provides high port-to-port isolation and very low amplitude and phase unbalance. It comes housed in a rugged aluminum alloy case ( $3.19 \times 4.18$ x 4.09") with your choice of SMA or N-Type connectors and an optional heat sink and fan for cooling.

${ }^{3}$ Heat sink and fan not included. Alternative heat sinking and heat removal must be provided by the user to limit maximum base-plate temperature to $55^{\circ} \mathrm{C}$, in order to ensure proper performance. For reference, this requires thermal resistance of user's external heat sink to be $1.3^{\circ} \mathrm{C} / \mathrm{W}$ max
