POWER PLUG 24W

DESCRIPTION

The Power Plug is a high efficiency AC/DC switch mode constant voltage generator. Designed for a variety of residential user applications, this wall plug-in power supply performs up to 24W output power. The output voltage and current levels can be set up by design in accordance with customer requirements.

Typical reference values for the off the shelf solution are 24V and 1A with the input V_{ac} 230 V_{rms} . Coming into a compact housing, the power plug can be assembled with EU, UK and USA plugs identified by specific ordering numbers. Output DC power is ensured via a 2 wires cord with strain relief, terminated with a barrel connector. Typical weight is 100 grams only, without cable.
