

TMS320C5515 eZdsp™ USB Stick Development Tool

The TMDX5515eZdsp is a small form factor, very-low-cost USB-powered DSP development tool which includes all the hardware and software needed to evaluate the industry's lowest power 16-bit DSP: the TMS320C5515. This tool is similar to the TMDX5505eZdsp in the form factor but provides more evaluation options such as USB 2.0 and SD interface. The USB port provides enough power to operate the ultra-low-power C5515 DSP so no external power supply is required. This ultra-low-cost tool allows quick and easy evaluation of the advanced capabilities of the C5515, C5514, C5505A and C5504A processors. This tool has an embedded XDS100 emulator for full source-level debug capability and supports Code Composer Studio™ (CCStudio) Integrated Development Environment (IDE) version 4.0 and eXpressDSP™ software which includes the DSP/BIOS™ kernel. The full contents of the Development Tool include C5515 eZdsp board CCStudio IDE Rev. 4.0.

Key features and benefits:

- Small form factor DSP development tool for the C5515 processor
- TMS320C5515 fixed-point low-power DSP
- Embedded XDS100 emulator
- Flash memory
- TLV320AIC3204 32-bit programmable low-power stereo codec
- USB and SD connectors
- Line in, headphone out vconnectors
- Expansion connectors
- Removable USB stick enclosure
- Includes Code Composer Studio IDE 4.0
- Full documentation on CD-ROM

processor and quickly optimize complex DSP algorithms in terms of performance and power consumption across a variety of design scenarios.

- Energy-efficient C5515 DSP allows the entire development tool to be powered by the USB port – **no other components or cables are needed.**
- Rich set of features including LCD 96×16 monochrome OLED display screen, MicroSD card slot, USB 2.0 port for applications, Bluetooth®/Chipcon expansion connector.

Software

- Designers can readily target the TMS320C5504/05/14/5 DSP through TI's robust and comprehensive Code Composer Studio IDE, including:
 - A complete Integrated Development Environment, an efficient optimizing C/C++ compiler assembler, linker, debugger, integrated CodeWright editor with CodeSense technology for faster code creation, data visualization, a profiler and a flexible project manager
 - DSP/BIOS™ real-time kernel
 - Chip Support Library

Community support

The eZdsp USB Stick is supported by TI's online community e2e.ti.com. Complete collateral, CCStudio IDE drivers, Chip Support Library (CSL) and all the required production-quality documentation for the DSP is available today. Complete schematics and layout files are available for the tool at

support.spectrumdigital.com/boards/usbstk5515/revA/ so customers can use this as a reference for their own system development.

Various examples in audio/musical special effects, digital filter design and many others

Technical details

The C5515 eZdsp USB Stick simplifies development by providing integrated features including:

- Complete Code Composer Studio v4 IDE for fast code development.
- On-board XDS100v2 emulator provides complete debugging capabilities and visibility inside the processor for algorithm optimization and benchmarking.
- On-board audio codec and connectors allow developers to evaluate the C5515

▲ C5515 eZdsp USB Stick development tool

will also be available in the community. Special pricing incentives are available for educators, university students and developers that actively participate in the community.

Get started today

The feature-rich C5515 eZdsp™ USB Stick Development Tool (part number: TMDX5515eZdsp) is available now for the low cost of U.S. \$79. Pricing includes full XDS100v2 emulator and the industry-leading CCSStudio v.4 IDE. To order, please visit

www.ti.com/c5515ezsp_epf.

The TMS320C551x DSP generation is supported by TI's extensive Developer Network, as well as a complete Chip Support Library, comprehensive application notes, reference designs, application guides, videos and online communities.

The platform bar, Code Composer Studio, DSP/BIOS, e2e and eXpressDSP are trademarks of Texas Instruments.

All other trademarks are the property of their respective owners.

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

TI products are not authorized for use in safety-critical applications (such as life support) where a failure of the TI product would reasonably be expected to cause severe personal injury or death, unless officers of the parties have executed an agreement specifically governing such use. Buyers represent that they have all necessary expertise in the safety and regulatory ramifications of their applications, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of TI products in such safety-critical applications, notwithstanding any applications-related information or support that may be provided by TI. Further, Buyers must fully indemnify TI and its representatives against any damages arising out of the use of TI products in such safety-critical applications.

TI products are neither designed nor intended for use in military/aerospace applications or environments unless the TI products are specifically designated by TI as military-grade or "enhanced plastic." Only products designated by TI as military-grade meet military specifications. Buyers acknowledge and agree that any such use of TI products which TI has not designated as military-grade is solely at the Buyer's risk, and that they are solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI products are neither designed nor intended for use in automotive applications or environments unless the specific TI products are designated by TI as compliant with ISO/TS 16949 requirements. Buyers acknowledge and agree that, if they use any non-designated products in automotive applications, TI will not be responsible for any failure to meet such requirements.
