

Introduction

The DSI to LCD adapter board provides a flexible connector from the microcontroller motherboard (Samtec high speed connector QTH-030) to the standard display connector (TE 1-1734248). The DSI to LCD adapter board can be used on STM32 evaluation boards or STM32 Discovery boards to connect the display.

The B-LCDAD-RPI1 adapter board features up to two lanes of MIPI/DSI data and I2C interface support, and enables the use of extended displays with standard DSI interface on STM32 EVAL/DK board family.

1 Ordering information

To order the B-LCDAD-RPI1 adapter board, refer to [Table 1](#):

Table 1. Ordering information

Order code	Product
B-LCDAD-RPI1	B-LCDAD-RPI1 adapter board

2 Hardware layout and configuration

The board is designed for easy use of the DSI to LCD display.

The block diagram shown in [Figure 2](#) illustrates the DSI and I2C control connection on the DSI to LCD adapter board. [Figure 3](#) indicates how to locate the components on the evaluation board (both front and back side are shown).

Figure 2. Block diagram

Figure 3. Board layout

3 Motherboard connector

A male high speed connector CN2 on bottom side is used to implement DSI to LCD adapter board on the motherboard. Two-lanes DSI signals and control signals (I2C bus) are on this connector. The pinout is detailed in [Table 2](#).

Table 2. Motherboard connector CN2

Pin number (odd)	Description	Interface	Pin number (even)	Description	Interface
1	GND	-	2	-	-
3	DSI_CK_P	DSI	4	-	-
5	DSI_CK_N	DSI	6	-	-
