

LT4180

Virtual Remote Sense Controller

DESCRIPTION

Demonstration circuit 1504A features the LT4180, a virtual remote sense controller which eliminates the need for remote sense wires to compensate for IR losses in cables and wires, and is used in conjunction with the LT3693 buck converter. The circuit is designed for an input voltage range of 8V to 36V with an output of 5V at 3A. The circuit board has a total wire resistance of 0.4Ω and a voltage drop of 1.2V. The circuit contains five selectable jumpers. JP1 turns the converter ON or Off, JP2-JP4 allow for easy selection of other dither frequency combinations, and

JP5 enables or disables spread spectrum operation. The LT4180 data sheet gives a complete description of the part, its operation and application information. The data sheet must be read in conjunction with this quick start guide for working on or modifying the demo circuit 1504A.

Design files for this circuit board are available at <http://www.linear.com/demo>

PERFORMANCE SUMMARY ($T_A = 25^\circ\text{C}$)

SYMBOL	PARAMETER	CONDITIONS	MIN	TYP	MAX	UNITS
V_{IN}	Input Supply Range		8		36	V
V_{OUT}	Output Voltage Accuracy	$V_{IN} = 8\text{V to } 36\text{V}, I_{LOAD} = 3\text{A}$	4.8V	5	5.2V	V
Ripple		$V_{IN} = 12\text{V}, I_{LOAD} = 3\text{A}$		50		mV
f_S	Buck Switching Frequency			500		KHz

QUICK START PROCEDURE

Demonstration circuit 1504A is easy to set up to evaluate the performance of the LT4180. Refer to Figure 2 for proper equipment setup and follow the procedure below.

When input or output voltage ripple is measured, care must be taken to avoid a long ground lead on the oscilloscope probe. Measure the input or output voltage ripple by touching the probe tip directly across the V_{IN} or V_{OUT} and GND terminals. See Figure 2 for proper scope probe technique.

1. Place jumpers in the following position:

JP1 On
JP2 Low
JP3 High
JP4 High
JP5 Low

QUICK START PROCEDURE

2. With power off, connect the input power supply to V_{IN} and GND.

Apply 8V to input.

Check for the proper output voltage.

NOTE. If there is no output, temporarily disconnect the load to make sure that the load is not set too high.

Once the proper output voltage is established, adjust the input voltage and load within the operating range and observe the output voltage regulation, ripple voltage, efficiency and other parameters.

DEMO MANUAL DC1504A

DEMONSTRATION BOARD IMPORTANT NOTICE

Linear Technology Corporation (LTC) provides the enclosed product(s) under the following **AS IS** conditions:

This demonstration board (DEMO BOARD) kit being sold or provided by Linear Technology is intended for use for **ENGINEERING DEVELOPMENT OR EVALUATION PURPOSES ONLY** and is not provided by LTC for commercial use. As such, the DEMO BOARD herein may not be complete in terms of required design-, marketing-, and/or manufacturing-related protective considerations, including but not limited to product safety measures typically found in finished commercial goods. As a prototype, this product does not fall within the scope of the European Union directive on electromagnetic compatibility and therefore may or may not meet the technical requirements of the directive, or other regulations.

If this evaluation kit does not meet the specifications recited in the DEMO BOARD manual the kit may be returned within 30 days from the date of delivery for a full refund. THE FOREGOING WARRANTY IS THE EXCLUSIVE WARRANTY MADE BY THE SELLER TO BUYER AND IS IN LIEU OF ALL OTHER WARRANTIES, EXPRESSED, IMPLIED, OR STATUTORY, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE. EXCEPT TO THE EXTENT OF THIS INDEMNITY, NEITHER PARTY SHALL BE LIABLE TO THE OTHER FOR ANY INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES.

The user assumes all responsibility and liability for proper and safe handling of the goods. Further, the user releases LTC from all claims arising from the handling or use of the goods. Due to the open construction of the product, it is the user's responsibility to take any and all appropriate precautions with regard to electrostatic discharge. Also be aware that the products herein may not be regulatory compliant or agency certified (FCC, UL, CE, etc.).

No License is granted under any patent right or other intellectual property whatsoever. **LTC assumes no liability for applications assistance, customer product design, software performance, or infringement of patents or any other intellectual property rights of any kind.**

LTC currently services a variety of customers for products around the world, and therefore this transaction **is not exclusive**.

Please read the DEMO BOARD manual prior to handling the product. Persons handling this product must have electronics training and observe good laboratory practice standards. **Common sense is encouraged.**

This notice contains important safety information about temperatures and voltages. For further safety concerns, please contact a LTC application engineer.
