

TS4990 low voltage audio power amplifier Evaluation board user guidelines

TS4990 features

- TS4990 low voltage audio power amplifier with active low standby mode
- Operating from $V_{CC}=2.2V$ to $5.5V$
- $1.2W$ output power @ $V_{CC}=5V$, $THD=1\%$, $F=1kHz$, with 8Ω load
- Ultra low power consumption in standby mode ($10nA$)
- $62dB$ PSRR @ $217Hz$ in grounded mode ($A_v=2V/V$)
- Near zero pop & click
- Ultra low distortion (0.1%)
- Module gain set at $2V/V$
- Thermal and short circuit protection

Description

The DEMO TS4990 is an evaluation board designed for the TS4990 low power audio amplifier. The micropackage DFN8 (dual flat non leaded 8 pins) allows space saving and good thermal dissipation.

The BTL gain is set at $2V/V$ and can be adapted if necessary with a modification of $R1$ or $R2$ values.

On the board, $R3$ and $C3$ component locations are empty to allow you to modify the input configuration from single ended to differential. For differential mode, $R4$ must be modified.

The $C1$ component location is also empty so that you can add a low pass filter if required.

More information about component calculations is available in the TS4990 datasheet.

Connector configuration

Caution: When you apply power supply through Cn1, DO NOT invert the polarity because it would destroy the amplifier U1.

Connector	Description
Cn1	Power connector (V_{CC} and GND). Power supply voltage from 2.2V to 5.5V.
Cn2 and Cn3	Input signal connector (GND and active input signal).
Cn4	Output signal connector (V_{out1} and V_{out2}).
Cn5	Standby control connector (V_{CC} , standby, GND). A short-circuit between V_{CC} and standby puts U1 in operation mode. A short-circuit between GND and Standby puts U1 in standby mode.

Figure 1. Schematic diagram

Component list for the DEMO TS4990/DFN

Designation	Quantity	Description
C1	0	Unconnected, ceramic capacitors, 0603
C2	1	100nF/16V, ceramic capacitors, 0603
C3	0	Unconnected, ceramic capacitors, 0603
C4	1	1μF/50V, electrolytic capacitor
C5	1	100nF/16V, ceramic capacitors, 0603
C6	1	1μF/50V, electrolytic capacitor
Cn1	1	2 pins header 2.54mm pitch
Cn2	1	2 pins header 2.54mm pitch
Cn3	1	2 pins header 2.54mm pitch
Cn4	1	2 pins header 2.54mm pitch
Cn5	1	3 pins header 2.54mm pitch
J1	1	Jumper, 2.54mm pitch
R1	1	22k, 1/16W 1% resistor, 0603
R2	1	22k, 1/16W 1% resistor, 0603
R3	0	Unconnected, 1/16W 1% resistor, 0603
R4	1	0R, 1/16W 1% resistor, 0603
U1	1	TS4990IQ (DFN8 package)

Evaluation board layout

The following schematics show the different layers and the top view of the evaluation board.
