

500 mA, high performance low dropout linear regulator

Features

- Input voltage range: 2.7 V to 6.5 V
- Very low output voltage noise: $13 \mu\text{V}_{\text{RMS}}/\text{V}_{\text{OUT}}$
- Low quiescent current: 48 μA typical
- 500 mA guaranteed output current
- Fast start-up time: 50 μs
- High PSRR: 65 dB at 100 Hz
- AEC-Q100 grade 1 qualified
- -40 °C to 125 °C ambient operative temperature range
- Very low dropout: 190 mV at max. I_{OUT}
- Adjustable (from 1.25 V to 6 V) or fixed output voltage on request (from 1.0 V to 4.3 V)
- Stable with low ESR capacitor: min. 2 μF
- Current limit and thermal protections
- DFN8 (3 x 3 mm) wettable flank package for automotive
- DFN8 (3 x 3 mm) standard for industrial

Applications

- Automotive Infotainment
- Low noise POL
- Automotive noise sensitive ECU
- Wireless communication
- Industrial applications

Description

The **LDLN050** is a 500 mA LDO regulator, designed to be used in several environments. The **LDLN050** has a very low-resistance pass element (PMOS) that is even very fast during the turn-on.

Thanks to its low-noise design, the **LDLN050** can be used to supply noise sensitive circuits such as sensors, MCUs and wireless ICs in automotive and industrial applications.

The LDO low current consumption (typically 48 μA) is also used on battery-supplied applications.

On the adjustable version, the output voltage can be set to any desired value between 1.25 V and 6 V. Fixed voltage versions, between 1.0 V and 4.3 V (with 0.1 V step) can be provided upon request.

On the fixed voltage versions only, an external capacitor can be connected to C_{NR} pin to further reduce the noise on the regulated output voltage.

The **LDLN050** is available in DFN8 (3 x 3 mm) standard and wettable flank package and it is automotive grade qualified according to AEC-Q100 level 1.
