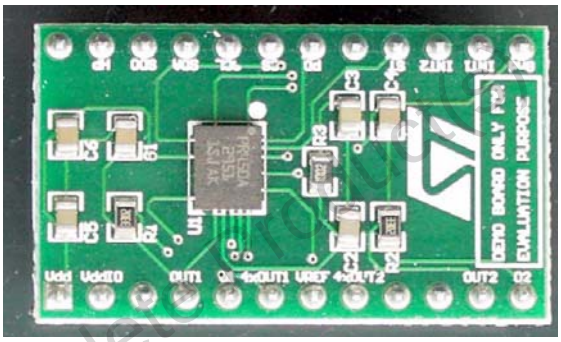
STEVAL-MKI096V1

LPR450AL adapter board for standard DIL 24 socket

Data brief

Features

- Complete LPR450AL pinout for a standard DIL 24 socket
- Fully compatible with all other available adapter boards
- RoHS compliant



STEVAL-MKI096V1

Description

The STEVAL-MKI096V1 is an adapter board designed to facilitate the evaluation of MEMS devices in the LPR450AL product family. The board offers an effective solution for fast system prototyping and device evaluation directly within the user's own application.

The STEVAL-MKI096V1 can be plugged into a standard DIL 24 socket. The adapter provides the complete LPR450AL pinout and comes ready-to-use with the required decoupling capacitors on the V_{DD} power supply line.

The pinout of the adapter is fully compatible with all other available adapter boards, making it possible to easily switch from one sensor to another during device evaluation without the need for board redesign.
