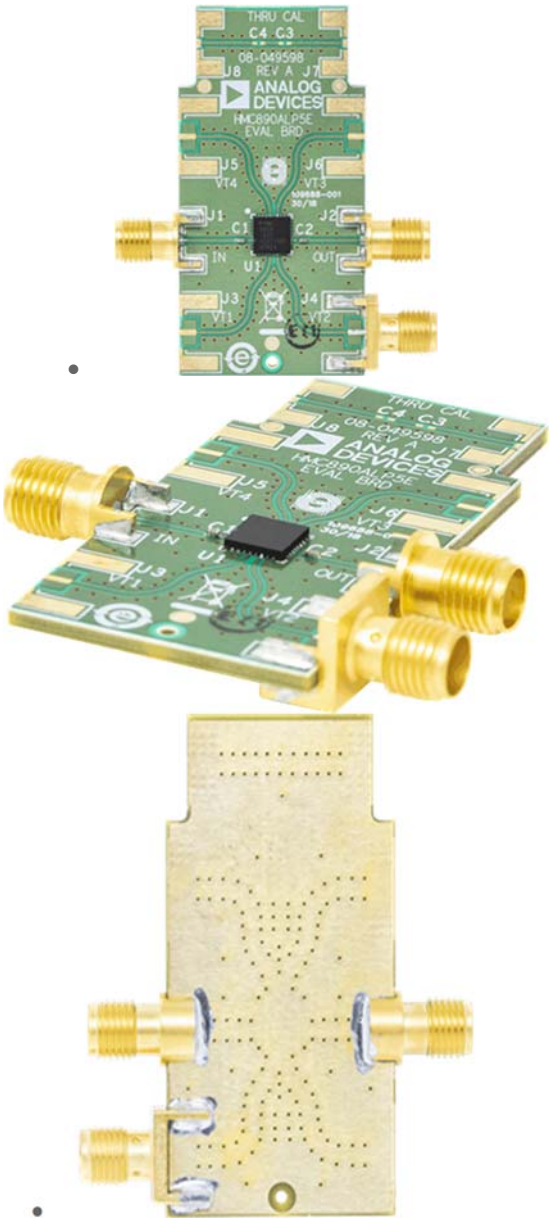
EV1HMC882ALP5

HMC882ALP5 Evaluation Board

Top



Overview

- Features and Benefits

- Single control voltage (VFCTL)
- Simple board design with minimal component requirement

- Product Details

The EV1HMC882ALP5 evaluation board can be used to evaluate all the features of the HMC882ALP5E. The EV1HMC882ALP5 has Subminiature Version A (SMA) connector to apply cutoff frequency control voltage (VFCTL) and SRI type Subminiature Version A (SMA) connectors for the RF input and output. The cutoff frequency can be adjusted by varying VFCTL from 0V to 14V.

Applicable Parts

- HMC882A
