

H.E.A.T Board

Harsh Environment Acquisition Terminal

Texas Instruments 200°C High Temperature Evaluation Module

General purpose “Signal Acquisition” High-Temp EVM

- World’s first High Temperature Evaluation Module with components qualified for extreme operating temperatures from -55°C to 210°C
- Easy to use development platform utilizing TI’s comprehensive signal-chain product portfolio offering including:
 - ADS1278-HT – Octal Simultaneous Sampling 24-Bit 128KSPS Analog-to-Digital Converter
 - SM470R1B1M-HT – ARM7 Microcontroller
 - OPA211-HT – Low-Noise Operational Amplifier
 - OPA2333-HT – Low Power Zero-Drift Series Operational Amplifier
 - INA333-HT – Zero Drift, Low Power, Single Supply Instrumentation Amplifier
 - THS4521-HT – Low-Power Fully Differential Amplifier
 - REF5025-HT – 2.5V Precision Voltage Reference
 - SN65HVD233-HT – CAN Transceiver
 - SN65HVD11-HT – RS485 Transceiver
- Signal conditioning, acquisition and processing
- Up to 8 channels of analog data
- Analog signals conditioned, digitized and processed at temperature
- 6 channels dedicated for temperature, pressure, and accelerometers
- 2 general purpose channels
 - One fully differential
 - One single ended
- All semiconductor devices are qualified and characterized to 210°C operation and 1,000 hour operating life
- The HEAT board is built with high temperature materials suited to withstand up to 250°C
 - Polyimide PCB material
 - High temperature rated passive components
 - High temperature solder
- Operational in a 200°C oven for 200 hours
- PCB Dimensions: 15.6” x 1.1”
- Target Applications:
 - Down-hole drilling
 - Commercial aviation (e.g. jet engines)
 - Heavy Industrial

This EVM is a key design tool for the HiRel High-Temp products and enables rapid evaluation and development of a 200°C data acquisition system

Important Notice: The products and services of Texas Instruments Incorporated and its subsidiaries described herein are sold subject to TI's standard terms and conditions of sale. Customers are advised to obtain the most current and complete information about TI products and services before placing orders. TI assumes no liability for applications assistance, customer's applications or product designs, software performance, or infringement of patents. The publication of information regarding any other company's products or services does not constitute TI's approval, warranty or endorsement thereof.

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

TI products are not authorized for use in safety-critical applications (such as life support) where a failure of the TI product would reasonably be expected to cause severe personal injury or death, unless officers of the parties have executed an agreement specifically governing such use. Buyers represent that they have all necessary expertise in the safety and regulatory ramifications of their applications, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of TI products in such safety-critical applications, notwithstanding any applications-related information or support that may be provided by TI. Further, Buyers must fully indemnify TI and its representatives against any damages arising out of the use of TI products in such safety-critical applications.

TI products are neither designed nor intended for use in military/aerospace applications or environments unless the TI products are specifically designated by TI as military-grade or "enhanced plastic." Only products designated by TI as military-grade meet military specifications. Buyers acknowledge and agree that any such use of TI products which TI has not designated as military-grade is solely at the Buyer's risk, and that they are solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI products are neither designed nor intended for use in automotive applications or environments unless the specific TI products are designated by TI as compliant with ISO/TS 16949 requirements. Buyers acknowledge and agree that, if they use any non-designated products in automotive applications, TI will not be responsible for any failure to meet such requirements.
