

TV/VCR TUNER IC WITH DC/DC CONVERTER

FEATURES

- Single Chip Mixer/Oscillator, Synthesizer, and 30-V DC/DC Converter for Tuning Amplifier
- VHF-L, VHF-H, UHF 3-Band Local Oscillator
- I²C Bus Protocol
- Four Data Bytes Transmission
- Low Noise DC/DC Converter
- 4ch NPN Emitter Follower Type Band Switch Drivers
- 4ch NPN Open Collector Type Ports
- Programmable Reference Divider Ratio (31.25 kHz, 50 kHz, or 62 kHz)
- 5-V Power Supply
- 38-Pin TSSOP Package

DESCRIPTION

The SN761677 is a single-chip synthesized tuner IC designed for TV/VCR tuning systems. The circuit consists of a PLL synthesizer, 3-band local oscillators and mixer, 30-V dc/dc converter for tuning the amplifier, four NPN emitter follower band drivers, four NPN open collector ports, and is available in a small package outline. The 15-bit programmable counter and reference divider are controlled by I²C bus control. Tuning step frequency is selectable by the reference divider ratio for a 4-MHz Xtal oscillator.

DA PACKAGE (TOP VIEW)
38-PIN TSSOP (DA)

Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet.

These devices have limited built-in ESD protection. The leads should be shorted together or the device placed in conductive foam during storage or handling to prevent electrostatic damage to the MOS gates.

ABSOLUTE MAXIMUM RATINGS

over operating free-air temperature range unless otherwise noted⁽¹⁾

		UNIT
Supply voltage ⁽²⁾ , V_{CC}	V_{CC} , TUV_{CC}	–0.4 V to 7 V
Input voltage 1 ⁽²⁾ , V_{GND}	RF GND, OSC GND, TUGND	–0.4 V to 0.4 V
Input voltage 2 ⁽²⁾ , $V_{(VTU)}$	VTU ⁽⁴⁾	–0.4 V to 35 V
Input voltage 3 ⁽²⁾ , V_{IN}	Other input pins	–0.4 V to 7 V
Continuous total dissipation ⁽³⁾ , P_D	$T_A \leq 25^\circ\text{C}$	1168 mW
Operating free-air temperature, T_A		–20°C to 85°C
Storage temperature range, T_{stg}		–65°C to 150°C
Maximum junction temperature, T_J		150°C
Maximum lead temperature 1,6 mm (1/16 inch) from case for 10 seconds		260°C
Maximum short circuit time, $t_{SC(max)}$	All pins to V_{CC}/TUV_{CC} , IFGND, OSCGND, RFGND, TUGND	10 sec

(1) Stresses beyond those listed under “absolute maximum ratings” may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under “recommended operating conditions” is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.

(2) Voltage values are with respect to the IF GND of the circuit.

(3) Derating factor is 9.34 mW/°C for $T_A \leq 25^\circ\text{C}$.

(4) 30 V max, when input from external power supply.

RECOMMENDED OPERATING CONDITIONS

		MIN	NOM	MAX	UNIT
Supply voltage, V_{CC}		4.5	5	5.5	V
Band switch driver source current, I_{BS}	One port on			10	mA
NPN port sink current, I_{NPN}	One port on		–10	–15	mA
Operating free-air temperature, T_A		–20		85	°C

CAUTION:

It is advised that precautions be taken to avoid damage due to high static voltages or electrostatic fields while handling this device. UHF OSC (pins 6–9) can withstand 1.5 kV and all other pins can withstand 2 kV, according to the Human Body Model (1.5 k Ω , 100 pF).

ELECTRICAL CHARACTERISTICS

$V_{CC} = 4.5\text{ V to }5.5\text{ V}$, $T_A = -20^\circ\text{C to }85^\circ\text{C}$ (unless otherwise noted)⁽¹⁾

PARAMETER		TEST CONDITIONS	MIN	TYP	MAX	UNIT
Total Device and Serial Interface						
I_{CC1}	Supply current 1 (VCC)			75	95	mA
I_{CC2}	Supply current 2 (VCC)	One band switch on ($I_{BS} = 10\text{ mA}$)		85	105	mA
I_{CC3}	Supply current 3 (TUVCC)	$I_{VDC} = 50\text{ }\mu\text{A}$		4	10	mA
V_{IH}	High-level input voltage (SCL, SDA)		3			V
V_{IL}	Low-level input voltage (SCL, SDA)				1.5	V
I_{IH}	High-level input current (SCL, SDA)				10	μA
I_{IL}	Low-level input current (SCL, SDA)		-10			μA
V_{POR}	Power-on reset supply voltage	Threshold of supply voltage between reset and operation mode	2.1	3.7	4	V
DC/DC Converter						
$V_{O(VDC)}$	Output voltage (VDC)	$I_{VDC} = 50\text{ }\mu\text{A}$		35		V
$I_{C(VDCM)}$	Output current (VDC)			230		μA
t_s	Output settling time (VDC)	From $V_{TUVCC} > 4.5\text{ V}$ to $V_{O(VDC)} < 28\text{ V}$		100		ms
I²C Interface						
V_{ASH}	Address select high-input voltage (AS)	$V_{CC} = 5\text{ V}$	4.5		5	V
V_{ASM}	Address select mid-input voltage (AS)	$V_{CC} = 5\text{ V}$	2		3	V
V_{ASL}	Address select low-input voltage (AS)	$V_{CC} = 5\text{ V}$			0.5	V
I_{ASH}	Address select high-input current (AS)				10	μA
I_{ASL}	Address select low-input current (AS)		-10			μA
$V_{I(ADC)}$	ADC input voltage	See Table 9	0		V_{CC}	V
$I_{IH(ADH)}$	ADC high-level input current	$V_{I(ADC)} = V_{CC}$			10	μA
$I_{IL(ADL)}$	ADC low-level input current	$V_{I(ADC)} = 0\text{ V}$	-10			μA
V_{OL}	Low-level output voltage (SDA)	$V_{CC} = 5\text{ V}$, $I_{OL} = 3\text{ mA}$			0.4	V
$I_{lkg(SDA)}$	High-level output leakage current (SDA)	$V_{SDA} = 5.5\text{ V}$			10	μA
F_{SCL}	Clock frequency (SCL)			100	400	kHz
$t_{h(DAT)}$	Data hold time	See timing chart in Figure 1	0			μs
t_{BUF}	Bus free time		1.3			μs
$t_{h(STA)}$	Start hold time		0.6			μs
$t_{h(low)}$	SCL low hold time		0.6			μs
$t_{h(igh)}$	SCL high hold time		0.6			μs
$t_{su(STA)}$	Start setup time		0.6			μs
$t_{su(DAT)}$	Data setup time		0.1			μs
t_r	SCL, SDA rise time				0.3	μs
t_f	SCL, SDA fall time				0.3	μs
$t_{su(STO)}$	STOP setup time		0.6			μs

ELECTRICAL CHARACTERISTICS (Continued) $V_{CC} = 4.5\text{ V to }5.5\text{ V}$, $T_A = -20^\circ\text{C to }85^\circ\text{C}$ (unless otherwise noted)⁽¹⁾

(1) The marketing status values are defined as follows:

ACTIVE: Product device recommended for new designs.

LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.

NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.

PREVIEW: Device has been announced but is not in production. Samples may or may not be available.

OBSOLETE: TI has discontinued the production of the device.

(2) Eco Plan - The planned eco-friendly classification: Pb-Free (RoHS), Pb-Free (RoHS Exempt), or Green (RoHS & no Sb/Br) - please check <http://www.ti.com/productcontent> for the latest availability information and additional product content details.

TBD: The Pb-Free/Green conversion plan has not been defined.

Pb-Free (RoHS): TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes.

Pb-Free (RoHS Exempt): This component has a RoHS exemption for either 1) lead-based flip-chip solder bumps used between the die and package, or 2) lead-based die adhesive used between the die and leadframe. The component is otherwise considered Pb-Free (RoHS compatible) as defined above.

Green (RoHS & no Sb/Br): TI defines "Green" to mean Pb-Free (RoHS compatible), and free of Bromine (Br) and Antimony (Sb) based flame retardants (Br or Sb do not exceed 0.1% by weight in homogeneous material)

(3) MSL, Peak Temp. - The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

(4) There may be additional marking, which relates to the logo, the lot trace code information, or the environmental category on the device.

(5) Multiple Device Markings will be inside parentheses. Only one Device Marking contained in parentheses and separated by a "-" will appear on a device. If a line is indented then it is a continuation of the previous line and the two combined represent the entire Device Marking for that device.

(6) Lead/Ball Finish - Orderable Devices may have multiple material finish options. Finish options are separated by a vertical ruled line. Lead/Ball Finish values may wrap to two lines if the finish value exceeds the maximum column width.

Important Information and Disclaimer: The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, enhancements, improvements and other changes to its semiconductor products and services per JESD46, latest issue, and to discontinue any product or service per JESD48, latest issue. Buyers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All semiconductor products (also referred to herein as "components") are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its components to the specifications applicable at the time of sale, in accordance with the warranty in TI's terms and conditions of sale of semiconductor products. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by applicable law, testing of all parameters of each component is not necessarily performed.

TI assumes no liability for applications assistance or the design of Buyers' products. Buyers are responsible for their products and applications using TI components. To minimize the risks associated with Buyers' products and applications, Buyers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any patent right, copyright, mask work right, or other intellectual property right relating to any combination, machine, or process in which TI components or services are used. Information published by TI regarding third-party products or services does not constitute a license to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of significant portions of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI components or services with statements different from or beyond the parameters stated by TI for that component or service voids all express and any implied warranties for the associated TI component or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

Buyer acknowledges and agrees that it is solely responsible for compliance with all legal, regulatory and safety-related requirements concerning its products, and any use of TI components in its applications, notwithstanding any applications-related information or support that may be provided by TI. Buyer represents and agrees that it has all the necessary expertise to create and implement safeguards which anticipate dangerous consequences of failures, monitor failures and their consequences, lessen the likelihood of failures that might cause harm and take appropriate remedial actions. Buyer will fully indemnify TI and its representatives against any damages arising out of the use of any TI components in safety-critical applications.

In some cases, TI components may be promoted specifically to facilitate safety-related applications. With such components, TI's goal is to help enable customers to design and create their own end-product solutions that meet applicable functional safety standards and requirements. Nonetheless, such components are subject to these terms.

No TI components are authorized for use in FDA Class III (or similar life-critical medical equipment) unless authorized officers of the parties have executed a special agreement specifically governing such use.

Only those TI components which TI has specifically designated as military grade or "enhanced plastic" are designed and intended for use in military/aerospace applications or environments. Buyer acknowledges and agrees that any military or aerospace use of TI components which have **not** been so designated is solely at the Buyer's risk, and that Buyer is solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI has specifically designated certain components as meeting ISO/TS16949 requirements, mainly for automotive use. In any case of use of non-designated products, TI will not be responsible for any failure to meet ISO/TS16949.
