

Product Advisory

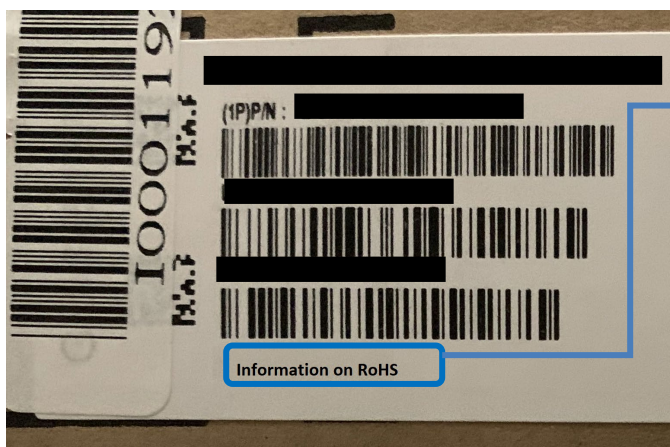

Issue Date: February 17, 2020

Reason:

This is an advisory on original PCN-BCA-001351; Issue date: February 26, 2019.

The effective date of change for the transition from Eutectic to Pb-free bumps will be a rolling change. In relation to RoHS EU directive 2011/65/EU in 2011 and its amendment Directive (EU) 2015/863 of 31 March 2015, some material shipped after March 1st 2020 will continue to have Eutectic bump interconnect metallurgy.

Below is the label information to make the necessary distinctions:

How to read the label?

- RoHS Exempt, Non-RoHS Compliant – these are exempt under exemption 15 for shipments per current EU RoHS directive prior to March 1st 2020
- RoHS Compliant – this will be the nomenclature on Lead Free parts that are compliant to the current EU RoHS directive

Parts Affected:

- BCM60333KFSBG
- BCM60335KFSBG
- BCM60500KFSBG
